

*Fighting teRrorIst Content Online*

Athens, 18 November 2022

## **PRESS RELEASE**

### **European project FRISCO project kicks-off in Athens, Greece**

A new European project funded under the European Commission's Internal Security Fund (ISFP) kicked off on 18 November 2022 with the name **FRISCO: Fighting teRrorIst Content Online**.

FRISCO is a two-year European project whose main objective is to support hosting service providers (HSPs), in particular micro and small providers, to comply with the new EU Regulation on terrorist content online (TCO) which addresses violent extremism and the dissemination of such content and sets out specific measures that HSPs must implement.

The activities that FRISCO will implement include (1) informing HSPs and raising awareness about the TCO Regulation regarding terrorist content available on the Internet, (2) developing and validating tools, frameworks and mechanisms to support HSPs, (3) hold events amongst experts so as to exchange experiences, best practices and provide them with tools to support the implementation of the Regulation.

The project activities are based, firstly, on mapping the technical and human needs of the targeted HSPs across Europe and raising their level of awareness of the TCO Regulation.

The partnership consists of seven (7) beneficiary partners from six (6) European countries: Coordinator [National Centre for Scientific Research Demokritos/NCSRD](#) (Greece), [Tremau](#) (France), [Stichting International Network against Cyber Hate/INACH](#) (Netherlands), [French Ministry of Interior - CIVI POL](#) (France), [Violence Prevention Network GGMBH/VPN](#) (Germany), [European Digital Learning Network/D-Learn](#) (Italy) and the [Informatikai, Tavkozelesi es Elektronikai Vallalkozasok Szovetsege/IVSZ](#) (Hungary).
